TITANIUM

Titanium PHP Team goals and delivery

2017-2018

Innovation / technologies boards

Frameworks	CMS	Issue tracking	Standards
------------	-----	----------------	-----------

1. Laravel
2. Slim
3. Symfony

1. Wordpress
2. Magento

1. Redmine
2. JIRA

1. PSR

Evaluation phase

This is a process to analyze the project requirements and provide a quote

Discovery phase

This phase is starting upon project approval. It should take 1-2 weeks

Development process

This stage is related namely with developing the product.

Time tracker for redmine:

https://play.google.com/store/apps/details?id=com.htc_cs.android.redminetracker&hl=en

Delivery stage

This stage will reflect the actual product that was developed

Project KPIs

1. Each one of PHP team member will complete a form according to the set timetable.
2. In 3 days we'll review the form.
3. For each one of the team member will be created a development plan and area of focus.
4. Checking the progress
 - a. Client feedback
 - b. Code review (it's done once is trying to merge with develop or master branch, should be approved by a team member)
 - c. Some technical tests
5. KPI (<https://score.titanium.codes/>)
 - a. Coverage = phpunit coverage
 - b. Ratio = pipelines delivery success ratio
 - c. w/o # = commits without task ref
